

INDIVIDUAL INJURY INFO: MOBILE

Manage injuries from the DragonFly app so you always know who is eligible to play even when you're on the go.

For each injury added by your athletic trainer, you can view basic details, as well as detailed information related to return to play and practice/play limitations. You will also receive a push notification each time an injury is entered or updated. Parents receive notifications too, so everyone caring for the athlete is on the same page.

From the injury list, tap on the name of the student. This will open in-depth information about the injury, including referrals, documents, images and rehab instructions.
